## CONCRETE POWER FINISHER

# Battery Edger Power Trowels

As a counterpart to our battery-powered trowel, Bunic now also offers an edge trowel in a battery-powered version.

The concrete trowel with 4 blades offers a large surface capacity for trowelling due to the working width of 650 mm and has a typical roll-off ring for edge trowels, which makes work in the edge area extremely easy.

In addition, the battery-powered edger is quiet and produces no emissions. It can therefore be used indoors without any problems. The tiller ensures ergonomic working and is equipped with a hand throttle switch for stepless speed control.

The machine is equipped with a quick wing adjustment. You also have an electronic display in the tiller arm, which shows all other relevant driving data in addition to the battery status. In addition, you can completely control the machine at the control unit (tiller arm) and activate the automatic system.

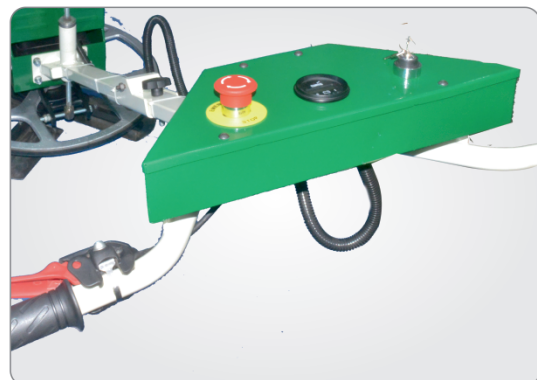

## TECHNICAL INFO

Drive	Direct
Working width	650mm
Battery	24V/52Ah
Charging cycles	2500
Drive time	Upto 4 hours
Charge time	2 hours from 20%
Continuous sound pressure level dB(A)	55 db(A)
Speed 1/min	40-200
Weight machine/battery	97/24kg
Charge current	220V
power kW/PS	1.5/2
motor	Battery, electric
safety	Dead man 's switch/Protective cage

## BENEFITS

- Quick charging system with exchangeable battery for non-stop operation
- Sustainable
- Low noise
- Emission-free
- Extremely high rotation
- Stable powder-coated frame
