## CONCRETE POWER FINISHER

# Battery Powered Mini Hardener Spreader

The New battery-operated Mini floor hardener spreader is a further development easy & safe doing of works.

The manual spreader often leaves operators foot mark in the concrete as well a huge effort must give in pushing and pulling the machine in wet concrete, the Boom spreader is a wonderful piece of machine, but cost is huge factor to consider.

Bunic's mini spreader will come close to the present industrial requirements.

## TECHNICAL INFO

|                            |                                |
|----------------------------|--------------------------------|
| Drive unit                 | Transaxle Drive                |
| Working Width              | 1000mm                         |
| hardener carrying capacity | 150 kgs                        |
| Battery                    | 52 Ah                          |
| Battery Working Cycle      | 5000                           |
| Drive Time                 | Up to 3 hours                  |
| Charging Time              | up to 2 hours                  |
| Motor Power                | 48v AC Induction Motor         |
| Motor Capacity             | 4kw                            |
| Max Speed                  | 10 KMPH                        |
| Spreader Shutter operation | Actuator Controlled - 3 stages |

## BENEFITS

- Efforts Less operations
- Plain tyres so no marks in the floors
- Radio controlled.
- Each wheel is independent allowing easy turning in tight spaces
- Exact material discharge per square metre
- Discharge rate 1 to 6KG
- Max hopper load 150KG
