

BPx75

CONCRETE POWER FINISHER

BATTERY POLE TROWEL

The Pole Trowel's lightweight design improves operator safety and allows for earlier commencement of concrete finishing when compared to heavier walk behind machines.

Matched with multiuse combination blades and a variable length pole, this unit achieves optimum control from up to 6 meters away and allows the operator to complete finishing works without the need to step foot on the wet concrete.

Easy control directional steering function allows for precise movement of the Pole Trowel by twisting the handle from side to side. Robust, durable, & fully sealed inline planetary gearbox, Hassle free for extended operation

TECHNICAL INFO

Drive unit	Planetary Gear Box 20:1 ration
Working Width	750mm
Battery	20 Ah on Back Pack
Battery Working Cycle	5000
Drive Time	Up to 3 hours
Charging Time	up to 2 hours
Motor Power	24v DC Motor
Motor Capacity	0.5 kw
Max Speed	70 rpm

BPx75

Blade pitch function of up to 25 degrees

- Allows for the Pole Trowel to be used for initial floating of the wet concrete right through to final finishing

Easy control directional steering function

- Allows for precise movement of the Pole Trowel by twisting the handle from side to side

REPLACEMENT BLADES FOUR PACK CLIP TOGETHER HANDLE

Working diameter	750mm
No. blades per rotor	4
Size (mm)	150 x 265
Weight (kg)	2.3 kg
Blades per pack	4

Product code	bPX752022
Description	Pole Trowel Clip Together Handle 1800 mm
Maximum number of handles	Max 3 handles to be used at one time. Additional handles will result in reduced control of the Pole Trowel

BENEFITS

- Blade pitch function of up to 25 degrees
- Allows for the Pole Trowel to be used for initial floating of the wet concrete right through to final finishing.
- Control from up to 6m away
- Variable length pole/stick for optimised control when finishing concrete.
- Lightweight design
- Improved operator comfort and safety
- Efficient operation
